

RESULTS OF THE MARCH 2013 UTAH VOTER POLL
12 March 2013

Information about the Survey

Researchers at Brigham Young University's Center for the Study of Elections and Democracy invited members of the Utah Voter Poll panel, a group of voters who were recruited at polling places across Utah on Election Day in 2004, 2006, 2008, 2010, and 2012, to complete an online survey between February 28, 2013 and March 11, 2013. For more about the poll, see the methodology section below.

Methodology

Survey Field Dates: February 28, 2013 – March 11, 2013.

Sample Size and Margin of Error:

In total, 1,155 respondents entered the survey; we have at least partial data from 1,144 respondents, while 1,019 respondents completed the entire survey. The margin of error for a simple random sample with a sample size of 1,019 is about + or – 3.07%. The Utah Voter Poll is drawn from the Utah Colleges Exit Poll, which has a sophisticated sample design. A “design effect” multiplier would make the margin of error slightly higher than this.

Response Rate:

The response rate for the Utah Voter Poll was 15.53% (see calculations below). Potential respondents were sent three invitations to participate, spaced a few days apart over the survey field period. Our decision to send three invitations follows standard practices for internet surveys seeking to maximize response rates with minimal field time and disruption to potential respondents.

Response rate calculation:

Total email addresses sent invitations: 7,241

Total valid email addresses that received at least one email: 6,560

Total accessed surveys: 1,144

Completed surveys: 1,019

Response rate = $1,019/6,560 = 15.53\%$

Weighting:

There was no weighting done for the March 2013 Utah Voter Poll.
